Sir,

Referring to your letter of the 22nd ultimo, I beg to inform you that the you may proceed with the erection of the root-house and granary combined in connection with the St Joseph's Industrial School . Care should , however , be taken not to exceed the total sum , ($1127.00) allowed for improvements for that Institution. You should also bear in mind that the expenditure must be incurred before the 30th June next , in order that the accounts (which should be forwarded promptly) may be paid from the current year's Appropriation.

Dear Sir :-

Replying to your favor of the 18th., we will say that it is quite practicable tp operate a storage battery in the manner you suggest, but the cost of such a battery would be quite high.

We do not handle the Storage Batteries, but we can obtain them for you if you decide to install them. Sufficient Batteries to operate Fifteen Lamps Ten hours would cost in the neighborhood of Eight Hundred Dollars, or say, about $1000.00 complete with their Switches and Overcharging Device. If you think it advisable to go into the matter, we will obtain prices on the necessary Storage Battery, and submit them to you.

I beg to acknowledge receipt of your letter of the I8th. instant re an improved method of lighting the St. Joseph Industrial School, and to say that on account of the cost Electric Lighting is entirely out of the question. Up to the present, all the schools situated at some distance from towns have advocated Acetylene Gas, and I should like you to communicate with Mr. L. de Galembert, Agent of the "Sunlight Gas Co. Ltd", 352 Main St. Winnipeg, who upon necessary information will be able to submit an estimate of the cost of setting a plant in your school. The light is a good one, as good if not better than Electric light, and costs less than coal-oil. The cost of setting the plant would be less than half that of an electric plant.
